APPENDIX

Fire Prevention Guidelines

- Booths with cooking shall have one 10lb ABC Fire Extinguisher. For every 3 cooking units an extra 10lb ABC extinguisher is required.
 - Extinguishers shall be tagged by a licensed extinguisher service company. All extinguishers shall be UL or FM approved.
 - All deep fryers shall be protected by the UL 300 wet chemical system. All systems shall have documentation that they have been inspected within the last 6 months by a licensed company. A fire suppression system is not required when cooking under the open sky (if fryer is outside the booth).
 - No open flames near or within a booth with overhead covers or side skirting.
 - All tents, canopies or temporary structures should have a permanently affixed label identifying the fire resistance of the material.
 - If the material does not have a flame resistance tag on it the following must be done;
 - Name and address of owners of tent or structure.
 - The date the fabric was last treated with flame resistant solution.
 - Trade name or kind of chemical used in treatment.
 - Name of person or firm treating the material.
 - Name of testing agency and/or test standard by which the fabric was tested.
 - One copy of this is to be kept on site and a second copy to be given to the fire department (Fire Marshall).
 - All cooking units outside of the tent/booth must be properly separated from pedestrian traffic. Proper barriers shall be located around cooking areas to isolate cooking area from patrons.
 - All propane tanks will be chained or secured down to prevent injury. They will also be properly tightened and checked for leaks.
 - All extension cords will be of proper rating for outdoor use. No overloading of circuits will be tolerated.
 - All food booths are subject to inspection by the Fire Marshall prior to opening with a follow up inspection if needed.
-
